NOTICE PAPER

QUESTIONS TABLED NOVEMBER 2nd, 1976

155. *Mr. Philip*—Enquiry of the Ministry—Will the Minister of Transportation and Communications inform the House: 1. Apart from the somewhat vague term “to provide system continuity” what criteria were used to determine the necessity for building the 406 extension. In particular, the following criteria: (a) What is the expected number of vehicles. Is this number sufficient to warrant a 4-lane highway. (b) What percentage relief will the 406 provide to the traffic on other streets in St. Catharines and Vineland. (c) To what extent will the cost of the extension be offset by reduction in street widening costs of parallel routes. (d) The main traffic problem in St. Catharines has been identified to be in north-south direction. What relief, if any, will the 406 bring. (e) Will the 406 extension provide improved connections to the city core or, considering the limited number of exits, will it rather act as a bypass for quick access to the shopping centre south of the core. 2. Are there engineering standards set to indicate at what minimum traffic volume a 4-lane highway becomes economically feasible. When were they set. How were they applied to the original decision. Do they still apply. Is there any truth to the statement: If the cost of the extension were to be covered by raising tolls, a toll rate of \$2.00 per single trip would be the minimum. If true, is this not an excessive subsidy from the taxpayer to a small number of beneficiaries. 3. The 406 was originally conceived in the early 1960's. Conditions have changed considerably since that time. Have these changed conditions been weighed against the criteria used to determine the economical feasibility for building a new road. (refer to question 2 for standard criteria). In particular, the following changes: (a) The expected population growth rate in the Niagara Region is reduced considerably, to about $\frac{2}{3}$ the original growth rate. (b) The 406 has not been completed to four lanes to Welland and has not been extended past Welland. Why then a 4-lane extension north. (c) Air pollution and noise have prompted many cities to keep high-speed roads away from the city centre. Has an environmental study by an independent group been conducted or planned. (d) World-wide fuel shortage may curtail automobile and truck traffic in the future. Was the possibility considered, that completion of the extension in 1985 could coincide with a considerable reduction in traffic. (e) Strong concerns have been expressed lately to preserve good agricultural land. How can you explain the compatibility of the decision to build the highway through fruitland with the stated policy of your Government to preserve fruitland. After applying the above-mentioned changes to the original standards (if existing) is the extension still an economically viable proposition. 4. Various alternative routes were considered and rejected in favour of the valley route. Has the Minister considered the use of the Canal Haulage Road, which runs east of the Welland Canal from the Thorold Tunnel to the Q.E.W.

156. *Mr. Angus*—Enquiry of the Ministry—Would each Minister indicate the exact method that they use to monitor and control expenditures against budget allocations, and to monitor uncommitted funds.

Can the Minister in fact assure the House that the OHIP subscriber files have been purged of duplicates.

II. Inasmuch as OHIP allows physicians to submit multiple claims on the same form, can the Minister assure the House that OHIP:—

- (i) Maintains records of the number of physician claims by physician by day, in an effort to assess the reasonableness of such claims.
- (ii) Compares ICDA codes for services provided by physicians in an effort to detect multiple billings for the same diagnostic procedure on the same day.
- (iii) Does not approve payments for periodic services (total physical examinations, etc.) more frequently than the OHIP guidelines allow.

(vi) What was the Gini Index for payments to each class of practitioner, and for all practitioners. (vii) What was the mean, mode, median and standard deviation for payments to each class of practitioner, for (a) those in solo practice; (b) those in non-clinic group practice; (c) those in clinics; and (d) those associated with teaching hospitals. What were these figures for those in urban and those in rural areas. IX. For each class of practitioner for each year, what was (a) the number practising under the Plan; and (b) the total amount paid out by age, sex and number of years since, firstly, they began practising medicine, and secondly, since they began practising medicine in Ontario. X. For each class of practitioner, for each year, what proportion of all such practitioners in Ontario are practising under the Plan. For each of these, what proportion of their total income is, or was, paid through the Plan. XI. For the calendar years 1971, 1972, 1973, 1974 and 1975, what were the total number of claims by ICDA and the type of service provided. How did these break down by classes of practitioner. XII. For each line item of the OHIP Estimate (1976077), what proportion of the estimated cost is ascribable to preventive medicine or public health measures, and what proportion to diagnosis and treatment of disease. How do these proportions compare to those actually incurred in all previous budget years, beginning with 1971. XIII. What proportion of its total projected budget does OHIP anticipate spending on research.

141. *Mr. Bullbrook*—Enquiry of the Ministry—Would the Ministry of Culture and Recreation supply a list of all Wintario grants, capital and operating, awarded since the beginning of the program, listed by constituency, and indicating the location and sponsor of the project and the amount of the grant.

143. *Mr. Breithaupt*—Enquiry of the Ministry—Would the Ministry supply a list of all Authorities, Boards, Commissions, Tribunals, advisory groups and Crown Corporations in Ontario. Would the Ministry advise the name and address of each directing member of each of such bodies; and the ministry to which each is responsible.
144. *Mr. Bain*—Enquiry of the Ministry—Is the Minister of the Environment aware of the recent response (October 19th, 1976) made by the Honourable Romeo LeBlanc, Federal Minister of the Environment, concerning federal action in the area of fluorocarbons and their effect on the environment. Further, is the Minister aware that in that statement Mr. LeBlanc suggested that the problem, "is one which

can only be attacked in a global way since it is a global problem. [it] is right to tie it to co-operation between not only the provinces and the federal government but between nations.”. Has the Minister met with or had discussions with Federal Authorities pursuant to this statement or to the problem of fluorocarbon contamination of the environment.

145. *Mr. Bain*—Enquiry of the Ministry—Does the Minister of the Environment intend to introduce legislation in Ontario to ban the use of fluorocarbons in aerosol products. If so, when.
146. *Mr. Bain*—Enquiry of the Ministry—Does the Minister of Consumer and Commercial Relations have information relating to the production and distribution of fluorocarbon-containing products in Ontario for the years of 1973, 1974 and 1975. In particular, would he provide the House with the following information for the afore-enumerated years; (i) the production of each major type of fluorocarbon by weight (F-11, F-12, F-22, F-113, F-114 and others); (ii) the companies which are producing each type of fluorocarbon and the types which each are producing; (iii) the value/number of aerosols being produced and/or sold in Canada; and (iv) the percentage of aerosols being produced and/or sold in Ontario which contain fluorocarbons.
147. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour provide the House with the following information concerning claims handled by the Workmen's Compensation Board: (i) the number of cases in 1973, 1974 and 1975 wherein the spouse of a recipient of an allowance was denied a pension on the death of the recipient under s. 42 (7) of the *Workmen's Compensation Act*; (ii) the number of cases in 1973, 1974 and 1975 wherein a recipient was receiving a 100% disability allowance and on his/her death the spouse was granted a pension; (iii) the number of cases in 1973, 1974 and 1975 wherein the spouse of a recipient was granted a pension on his/her death due to the fact that the compensable injury was deemed to be the “cause” of death.
148. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour inform the House as to the definition of “cause” under s. 42 (7) of the *Workmen's Compensation Act* which the Board uses in determining whether or not an allowance should be made into a pension.
149. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour provide the House with the following information: the average percentage decrease/increase in the amount granted to the spouse of a recipient of Workmen's Compensation when a disability allowance is transferred to become a pension (for 1973, 1974, 1975).
150. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour consider directing the Workmen's Compensation Board to make regulations under s. 77 (1) to allow a claimant or his/her designated agent “reasonable” access to information in his/her file for the purposes of the claim.

151. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour inform the House as to the number of applications made to the Workmen's Compensation Board in 1973, 1974 and 1975 by claimants who had contracted a disease through, by or in their employment but who were disqualified because the disease was not disabling. Further, have any such claims been accepted and if so, how many.
152. *Mr. Angus*—Enquiry of the Ministry—Would the Minister of Industry and Tourism table all construction drawings, documents, contracts relating to the renovation and development of Minaki Lodge, and copies of all construction inspection reports; in addition, would the Minister table all quality analysis reports for the past five years.
153. *Mr. Angus*—Enquiry of the Ministry—Would the Minister of Government Services please list the yearly payments and the length of the lease agreement for those buildings in Northern Ontario leased to the Province of Ontario, and constructed by Dante, Gasparotto, Group Buildings Systems Limited, Ormiston Investments, and Tom Jones & Sons.
154. *Mr. Angus*—Enquiry of the Ministry—Would each Ministry indicate the total amount of Accounts Payable as of March 31st, 1976, that was applied to the budget of the 1975/76 fiscal year, and the 1976/77 fiscal year.
155. *Mr. Philip*—Enquiry of the Ministry—Will the Minister of Transportation and Communications inform the House: 1. Apart from the somewhat vague term "to provide system continuity" what criteria were used to determine the necessity for building the 406 extension. In particular, the following criteria: (a) What is the expected number of vehicles. Is this number sufficient to warrant a 4-lane highway. (b) What percentage relief will the 406 provide to the traffic on other streets in St. Catharines and Vineland. (c) To what extent will the cost of the extension be offset by reduction in street widening costs of parallel routes. (d) The main traffic problem in St. Catharines has been identified to be in north-south direction. What relief, if any, will the 406 bring. (e) Will the 406 extension provide improved connections to the city core or, considering the limited number of exits, will it rather act as a bypass for quick access to the shopping centre south of the core. 2. Are there engineering standards set to indicate at what minimum traffic volume a 4-lane highway becomes economically feasible. When were they set. How were they applied to the original decision. Do they still apply. Is there any truth to the statement: If the cost of the extension were to be covered by raising tolls, a toll rate of \$2.00 per single trip would be the minimum. If true, is this not an excessive subsidy from the taxpayer to a small number of beneficiaries. 3. The 406 was originally conceived in the early 1960's. Conditions have changed considerably since that time. Have these changed conditions been weighed against the criteria used to determine the economical feasibility for building a new road. (refer to question 2 for standard criteria). In particular, the following changes: (a) The expected population growth rate in the Niagara Region is reduced considerably, to about $\frac{2}{3}$ the original

growth rate. (b) The 406 has not been completed to four lanes to Welland and has not been extended past Welland. Why then a 4-lane extension north. (c) Air pollution and noise have prompted many cities to keep high-speed roads away from the city centre. Has an environmental study by an independent group been conducted or planned. (d) World-wide fuel shortage may curtail automobile and truck traffic in the future. Was the possibility considered, that completion of the extension in 1985 could coincide with a considerable reduction in traffic. (e) Strong concerns have been expressed lately to preserve good agricultural land. How can you explain the compatibility of the decision to build the highway through fruitland with the stated policy of your Government to preserve fruitland. After applying the above-mentioned changes to the original standards (if existing) is the extension still an economically viable proposition. 4. Various alternative routes were considered and rejected in favour of the valley route. Has the Minister considered the use of the Canal Haulage Road, which runs east of the Welland Canal from the Thorold Tunnel to the Q.E.W.

156. *Mr. Angus*—Enquiry of the Ministry—Would each Minister indicate the exact method that they use to monitor and control expenditures against budget allocations, and to monitor uncommitted funds.

NOTICE PAPER

GOVERNMENT NOTICES OF MOTION

3. *Mr. McKeough*—That this House give consideration to “Trends and Options” and other documents related to Ontario’s future, tabled by the Treasurer on April 8, 1976.
8. *Mr. Timbrell*—Motion—That the Order for adoption of the Final Report of the Select Committee inquiring into Hydro’s proposed bulk power rates be discharged but that the House adopt the following Resolution in lieu thereof:—“That the Legislature adopt the policy direction of the Select Committee’s report and the modifications as proposed by the Government to specific recommendations as follows”: III-7. (re bulk metering) That, the Legislature endorse the study of bulk metering practices now being conducted by Ontario Hydro and the municipal utilities to be completed within 12 months, and that, recommendations from Ontario Hydro be considered by the Government at that time; and that, in the interim, the Legislature further endorse the moratorium on conversions to or from bulk metering which has been initiated by the municipal utilities. III-11. (re revolving capital pool for industry) That, pending study by the Government as to the financial implications and statutory requirements of a revolving capital pool for industry, and as to whether this would be the best technique to encourage energy conservation by industry, a decision on this recommendation be deferred. III-18. (re peak reduction targets) That, the Government make an interim report to the Legislature within 2 months on the specific peak demand reduction targets which are to be met by Ontario Hydro for each year over the next 10 years, and the changes, Legislative and otherwise, which must be made to permit a workable load management program. III-23. That pending the development of, and experience with, Hydro’s load management program, Ontario Hydro not further reduce its targets for adding generation capacity in the next 10 years. III-24. That, pending the development of, and experience with, Hydro’s load management program, Ontario Hydro not develop a new generation plan which would reduce its planned growth in its generation capacity. III-27. (re James Bay) That, the Government request Ontario Hydro to continue its investigations of the potential which might exist for Ontario from developments of the hydro-electric potential in the Baie James area of Quebec; and that, in view of public hearings being held by the Royal Commission on Electric Power Planning and their intent to make recommendations to the Government on hydro-electric resource development in the Province, the Government advise Ontario Hydro that there will be no development of the Albany River at this time. III-28. (re examination of nuclear commitment) That, the Legislature endorse the review of nuclear power being conducted by the Royal Commission on Electric Power Planning. III-29 (iii) (re monitoring Select Committee)

That, in order to permit sufficient time to implement the recommendations approved by the Legislature, consideration of a monitoring Select Committee be deferred for 1 year. IV-3. That, considering water power is an energy resource in the same vein as coal, uranium, oil and natural gas, Ontario Hydro not be exempt from water power rentals.

Would the Ministry advise the name and address of each directing member of each of such bodies; and the ministry to which each is responsible.
144. *Mr. Bain*—Enquiry of the Ministry—Is the Minister of the Environment aware of the recent response (October 19th, 1976) made by the Honourable Romeo LeBlanc, Federal Minister of the Environment, concerning federal action in the area of fluorocarbons and their effect on the environment. Further, is the Minister aware that in that statement Mr. LeBlanc suggested that the problem, “is one which

can only be attacked in a global way since it is a global problem. [it] is right to tie it to co-operation between not only the provinces and the federal government but between nations.”. Has the Minister met with or had discussions with Federal Authorities pursuant to this statement or to the problem of fluorocarbon contamination of the environment.

145. *Mr. Bain*—Enquiry of the Ministry—Does the Minister of the Environment intend to introduce legislation in Ontario to ban the use of fluorocarbons in aerosol products. If so, when.
146. *Mr. Bain*—Enquiry of the Ministry—Does the Minister of Consumer and Commercial Relations have information relating to the production and distribution of fluorocarbon-containing products in Ontario for the years of 1973, 1974 and 1975. In particular, would he provide the House with the following information for the afore-enumerated years; (i) the production of each major type of fluorocarbon by weight (F-11, F-12, F-22, F-113, F-114 and others); (ii) the companies which are producing each type of fluorocarbon and the types which each are producing; (iii) the value/number of aerosols being produced and/or sold in Canada; and (iv) the percentage of aerosols being produced and/or sold in Ontario which contain fluorocarbons.
147. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour provide the House with the following information concerning claims handled by the Workmen's Compensation Board: (i) the number of cases in 1973, 1974 and 1975 wherein the spouse of a recipient of an allowance was denied a pension on the death of the recipient under s. 42 (7) of the *Workmen's Compensation Act*; (ii) the number of cases in 1973, 1974 and 1975 wherein a recipient was receiving a 100% disability allowance and on his/her death the spouse was granted a pension; (iii) the number of cases in 1973, 1974 and 1975 wherein the spouse of a recipient was granted a pension on his/her death due to the fact that the compensable injury was deemed to be the “cause” of death.
148. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour inform the House as to the definition of “cause” under s. 42 (7) of the *Workmen's Compensation Act* which the Board uses in determining whether or not an allowance should be made into a pension.
149. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour provide the House with the following information: the average percentage decrease/increase in the amount granted to the spouse of a recipient of Workmen's Compensation when a disability allowance is transferred to become a pension (for 1973, 1974, 1975).
150. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour consider directing the Workmen's Compensation Board to make regulations under s. 77 (1) to allow a claimant or his/her designated agent “reasonable” access to information in his/her file for the purposes of the claim.

151. *Mr. Bain*—Enquiry of the Ministry—Would the Minister of Labour inform the House as to the number of applications made to the Workmen's Compensation Board in 1973, 1974 and 1975 by claimants who had contracted a disease through, by or in their employment but who were disqualified because the disease was not disabling. Further, have any such claims been accepted and if so, how many.
152. *Mr. Angus*—Enquiry of the Ministry—Would the Minister of Industry and Tourism table all construction drawings, documents, contracts relating to the renovation and development of Minaki Lodge, and copies of all construction inspection reports; in addition, would the Minister table all quality analysis reports for the past five years.
153. *Mr. Angus*—Enquiry of the Ministry—Would the Minister of Government Services please list the yearly payments and the length of the lease agreement for those buildings in Northern Ontario leased to the Province of Ontario, and constructed by Dante, Gasparotto, Group Buildings Systems Limited, Ormiston Investments, and Tom Jones & Sons.
154. *Mr. Angus*—Enquiry of the Ministry—Would each Ministry indicate the total amount of Accounts Payable as of March 31st, 1976, that was applied to the budget of the 1975/76 fiscal year, and the 1976/77 fiscal year.
155. *Mr. Philip*—Enquiry of the Ministry—Will the Minister of Transportation and Communications inform the House: 1. Apart from the somewhat vague term "to provide system continuity" what criteria were used to determine the necessity for building the 406 extension. In particular, the following criteria: (a) What is the expected number of vehicles. Is this number sufficient to warrant a 4-lane highway. (b) What percentage relief will the 406 provide to the traffic on other streets in St. Catharines and Vineland. (c) To what extent will the cost of the extension be offset by reduction in street widening costs of parallel routes. (d) The main traffic problem in St. Catharines has been identified to be in north-south direction. What relief, if any, will the 406 bring. (e) Will the 406 extension provide improved connections to the city core or, considering the limited number of exits, will it rather act as a bypass for quick access to the shopping centre south of the core. 2. Are there engineering standards set to indicate at what minimum traffic volume a 4-lane highway becomes economically feasible. When were they set. How were they applied to the original decision. Do they still apply. Is there any truth to the statement: If the cost of the extension were to be covered by raising tolls, a toll rate of \$2.00 per single trip would be the minimum. If true, is this not an excessive subsidy from the taxpayer to a small number of beneficiaries. 3. The 406 was originally conceived in the early 1960's. Conditions have changed considerably since that time. Have these changed conditions been weighed against the criteria used to determine the economical feasibility for building a new road. (refer to question 2 for standard criteria). In particular, the following changes: (a) The expected population growth rate in the Niagara Region is reduced considerably, to about $\frac{2}{3}$ the original

growth rate. (b) The 406 has not been completed to four lanes to Welland and has not been extended past Welland. Why then a 4-lane extension north. (c) Air pollution and noise have prompted many cities to keep high-speed roads away from the city centre. Has an environmental study by an independent group been conducted or planned. (d) World-wide fuel shortage may curtail automobile and truck traffic in the future. Was the possibility considered, that completion of the extension in 1985 could coincide with a considerable reduction in traffic. (e) Strong concerns have been expressed lately to preserve good agricultural land. How can you explain the compatibility of the decision to build the highway through fruitland with the stated policy of your Government to preserve fruitland. After applying the above-mentioned changes to the original standards (if existing) is the extension still an economically viable proposition. 4. Various alternative routes were considered and rejected in favour of the valley route. Has the Minister considered the use of the Canal Haulage Road, which runs east of the Welland Canal from the Thorold Tunnel to the Q.E.W.

156. *Mr. Angus*—Enquiry of the Ministry—Would each Minister indicate the exact method that they use to monitor and control expenditures against budget allocations, and to monitor uncommitted funds.
157. *Mr. Philip*—Enquiry of the Ministry—Would the Minister of Culture and Recreation advise how much has been spent to date under the Wintario Program on sports and recreation equipment. Would he provide a list of the equipment purchased and the average cost of each different item. Would he list the manufacturers and/or distributors from whom the equipment was purchased and also indicate the manner in which contracts for the equipment were awarded.
158. *Mr. Philip*—Enquiry of the Ministry—Would the Minister of Culture and Recreation advise how many complaints his ministry has received about soccer balls supplied to clubs under the Wintario Program. What has the average cost per ball been. What companies were these balls purchased from. Is there any truth in the statement that many of the balls supplied to soccer clubs have not been of regulation size.
